

OptimiDoc

We simplify the world of documents

OptimiDoc Cloud platform for Sharp

OptimiDoc Cloud platform seamlessly integrates with Sharp multifunction printers, delivering unlimited printing, enhanced security, and efficient scanning workflows through the user-friendly OptimiDoc Cloud integration.

All you need is just an Internet connection.

Functions for Smart Devices

These functions enhance and simplify the use of a print environment same as applications in smartphones.

Concentrate on Business, Not IT

On-line printing and digitalisation services guarantee that employees can give their full attention to their own work.

Latest features

Automatic cloud updates allow you to take advantage of the latest features instantly.

No Hidden Costs

The customer has a clear idea of the monthly costs for all printing services used.

Scalable Architecture

Customers can quickly adjust the scale of the print environment to suit their business needs.

Sustainability

Less printing and more digitalised documents aid sustainability.

OptimiDoc Cloud Platform

OptimiPrint

Revolutionize your print management experience with OptimiPrint, a serverless solution that eliminates the need for expensive local print servers while embracing a zero-trust architecture.

OptimiPrint empowers you to effortlessly deploy printers across your entire organization without relying on local print servers. Users can seamlessly print directly to a printer or opt for secure cloud pull printing. This flexibility means users are no longer restricted by their physical location; they can initiate print jobs from their home office, the airport, or a local coffee shop. Additionally, users can conveniently print documents directly from various cloud storage platforms such as OneDrive or Google Drive.

Every operation is meticulously accounted for, attributing it to the specific user, and all accounting information is transmitted to the OptimiDoc Cloud data center. This ensures accurate tracking and provides the necessary data for comprehensive reports on print environment utilization at a later stage.

OptimiCapture

Empower your office beyond its physical confines with a document capture solution that enables your employees to work seamlessly anytime, anywhere. Whether using an MFP device, mobile application, or web browser, they can effortlessly scan, convert, and store documents.

OptimiCapture offers a user-friendly tool for everyday scanning, allowing users to send scanned documents to various destinations such as OneDrive, SharePoint, or Email. Furthermore, users have the flexibility to choose the final file type or browse and designate the precise location within cloud storage. In addition to routine scanning, OptimiCapture enables companies to digitize their standard documents with advanced processing capabilities. This includes extracting information from documents or prompting user interaction to input required data during the scanning process.

The scanning processes are highly flexible and can be fully configured to meet the specific needs and expectations of each customer.

DEVICE AUTHENTICATION

- Device authentication by card
- Device authentication by PIN
- Card assignment
- OptimiDoc application authentication only by User List
- OptimiDoc application authentication only by PIN
- OptimiDoc application authentication only by SingleSign on with 3rd party app

ACCESS RIGHTS

- Scan workflows access rights
- Print connectors access rights
- Color print/copy restriction
- Groups

DIRECT AND PULL PRINT

- Cloud pull printing
- Supported storages for pull print: OptimiDoc Datacentre, Microsoft OneDrive, Microsoft SharePoint, DropBox, Box
- User-specific/shared pull print
- Finishing options on the device
- Job management
- Direct print from the workstation (Windows/macOS)
- Central printers and driver management

PRINT CONNECTORS

- Printing from cloud storage
- Supported cloud storage: Microsoft OneDrive, Microsoft SharePoint, Google Drive, DropBox, Box, FTP/SFTP/FTPS
- Finishing options on the device
- Force BW/Duplex

ACCOUNTING AND REPORTING

- Print/scan/copy accounting
- Web reports
- Data export

DOCUMENT CAPTURE

- Supported manual parameters: String, Date, Time, Number, List, Password, SharePoint Site, SharePoint Document library, Boolean, Folder
- Job assembly
- Scan settings definition

DOCUMENT PROCESSING

- Remove black borders
- Remove punch holes
- Automated image de-skewing
- Image despeckling
- Blankpage removal
- Barcode recognition

- Bulk scans separation: Barcode, Blankpage, Predefined number of pages PDF metadata
- PDF encryption
- PDF digital signature
- PDF redaction
- MRC compression

OUTPUT FORMATS

- TIFF/PDF
- TXT/RTF
- Searchable PDF
- Microsoft Word/Excel/Powerpoint (maximally 10 pgs per document)
- vCard

DESTINATIONS AND STORAGES

- Email
- Microsoft OneDrive
- Microsoft SharePoint
- Google Drive
- Box.com
- Dropbox
- FTP/FTPS/SFTP
- OptimiDoc Cloud Storage
